Further informations

- Our EA has an 50 USD minimum deposit requirement with proper leverage.
- The MetaTrader4 and Expert Advisor should work 24 hours pro day. Running only some hours pro day will cause totally different results.
- It is not recommended to use GoldBull EA's cracked version. We are applied difficult and unique security algorithms which is extremely hard to crack. A hacked version of GoldBull will not work properly and is going to lead to losing your money.
